

Integrated Jail Management System

View and manage inmate classification, medical status, property location, commissary accounts, scheduling, visitors, and transportation from any networked computer in the correctional facility. The system provides paperless event journalizing, staff assignments and scheduling. Secure User IDs and passwords control the level of user access.

REJIS is a local government agency created to “serve the public interest through delivering quality, cost-effective technology services to the justice community and to government and quasi-government agencies.” REJIS’ primary focus is to provide record management services to law enforcement, courts, and corrections agencies at the local, state and federal levels. This includes interfaces to the Missouri State Highway Patrol’s MULES system, the National Crime Information Center (NCIC), and the NLETS network. REJIS was founded in 1975 under a cooperative agreement between St. Louis County and the City of St. Louis. Our customers are primarily concentrated in the metropolitan St. Louis and southwestern Illinois areas.

REJIS services include:

- Development of custom applications
- Installation and support of custom and commercially available software
- Custom interfaces
- IT Support Service
- Data center outsourcing
- Network, training and help desk support.

REJIS has approximately 140 employees located at three sites. Most of the staff and equipment is based at the REJIS building, in the Central West End of St. Louis.

For additional information on REJIS services, contact your REJIS Client Services Representative or the REJIS Help Desk (314-535-9497 or 1-888-923-7255).

Features and Benefits

Intake Processing

Past Confinement Smart Search ensures each Inmate Identification Number is assigned for life. Additional numeric identifiers may be collected under the primary Inmate Number, including:

Local (LID/CID)	State (SID)
Federal (FBI)	SSN
OCN	JIS Court Case
REJIS Arrest Booking	

Multi-Facility Management

Cell Movement, Event Processing and Officer Notes, and Multi-Facility Capability are all functions that can be monitored and controlled from any computer connected to the IJMS network.

Inmate Management

System wide Alert Instant Messaging for medical and suicidal inmates. Inmate record retention of alias names, associates, co-defendants, enemies, relatives, arrest charge review and visitors. Client configurable questionnaires with point accumulative model to determine appropriate housing. Journaling for Inmate Chronological Notes for paperless data collection; enhanced interface to JIS (Justice Information Service), schedules and dispositions; tracking of inmate issued and personal property; incident/grievance and hearing data; all maintained in one concise electronic file. Complete confinement history, release, and sentence calculation.

Jake’s Law Notification

No release until the victim notification process is complete.

Accounting Functions

Commissary processing and inmate bond management, cash drawer and court disbursement.

Internal and External Interfaces*

IJMS can provide Law Enforcement Interface Integration including REJIS, state and national active wanted records, REJIS Arrest Records, Hit Notification System, IRIS Mug Shots, Housing Unit Card, Line Up, Wristband, Live Scan, Social Security Administration, CrimeMATRIX and Inmate Phone System modules.

IJMS Summary of Features
