

Integrated Metropolitan Docketing System

The Integrated Metropolitan Docketing System, or IMDS, is a court management system for municipal courts. The application handles all municipal court functions from the initial filing to final disposition, including partial payment of fines and costs. The system supports optional interfaces with the law enforcement system for automated warrant entry and cancellation. The interface connects to the Missouri Department of Revenue for automated prior convictions for traffic violators. IMDS supports DOR conviction reporting.

REJIS is a local government agency created to “serve the public interest through delivering quality, cost-effective technology services to the justice community and to government and quasi-government agencies.” REJIS’ primary focus is to provide record management services to law enforcement, courts, and corrections agencies at the local, state and federal levels. This includes interfaces to the Missouri State Highway Patrol’s MULES system, the National Crime Information Center (NCIC), and the NLETS network. REJIS was founded in 1975 under a cooperative agreement between St. Louis County and the City of St. Louis. Our customers are primarily concentrated in the metropolitan St. Louis and southwestern Illinois areas.

REJIS services include:

- Development of custom applications
- Installation and support of custom and commercially available software
- Custom interfaces
- IT Support Service
- Data center outsourcing
- Network, training and help desk support.

REJIS has approximately 140 employees located at three sites. Most of the staff and equipment is based at the REJIS building, in the Central West End of St. Louis.

For additional information on REJIS services, contact your REJIS Client Services Representative or the REJIS Help Desk (314-535-9497 or 1-888-923-7255).

Benefits and Features

- Customizable case types and docket types
- Interfaces to REJIS law enforcement systems
- Background Wanted check - An automatic check of the REJIS active wanted file—for all defendants on a docket
- Electronic audit trail for tracking transactions
- Cash reporting capabilities
- Code tables based on state and national standards, with customization capabilities
- Department of Revenue Conviction (DOR) Reporting - Allows user to submit reports in either paper or electronic format to DOR
- Interface to DOR driver history records for prior convictions
- Attorney name and bar number verification provided through a cooperative effort with The Missouri Bar Association
- Provides extensive management and statistical reporting, including the OSCA Municipal Division Summary Reporting Form
- Mobile Ticketing interface allows docket scheduling at the time a ticket is written, in addition to creating an IMDS case automatically
- Easy filing of cases using drop downs and user friendly screen designs
- Unique receipt numbers and real time receipt balancing
- Real time reports for disbursements to multiple accounts
- Standardized reports, letters, and notifications, with customization capabilities
- Bond capabilities, including forfeitures and payments
- Secure court data sharing with approved agencies
- All data resides on a server located at REJIS. The server, license(s), data backup, monitoring and security patches are included as part of this service.
- Red Light Camera service interface that will automatically create a case in IMDS, automatically schedule the case to a “camera ticket” docket, and provide a report to the service provider when the disposition is guilty and the fine is paid.
