

## Image Resource Information System

Jointly developed by REJIS and St. Louis County PD, IRIS (Image Resource Information System) is a revolutionary regional mug shot system which allows users to capture photos with a digital camera and store these images in a regional database. These images are used to develop suspect lineups, register convicted sex offenders, and search for specific scars, marks and tattoos that help identify suspects.

*REJIS is a local government agency created to “serve the public interest through delivering quality, cost-effective technology services to the justice community and to government and quasi-government agencies.” REJIS’ primary focus is to provide record management services to law enforcement, courts, and corrections agencies at the local, state and federal levels. This includes interfaces to the Missouri State Highway Patrol’s MULES system, the National Crime Information Center (NCIC), and the NLETS network. REJIS was founded in 1975 under a cooperative agreement between St. Louis County and the City of St. Louis. Our customers are primarily concentrated in the metropolitan St. Louis and southwestern Illinois areas.*

### REJIS services include:

- Development of custom applications
- Installation and support of custom and commercially available software
- Custom interfaces
- IT Support Service
- Data center outsourcing
- Network, training and help desk support.

*REJIS has approximately 140 employees located at three sites. Most of the staff and equipment is based at the REJIS building, in the Central West End of St. Louis.*

*For additional information on REJIS services, contact your REJIS Client Services Representative or the REJIS Help Desk (314-535-9497 or 1-888-923-7255).*

## Benefits & Features

- **Easy to use:** Provides a method to capture and retrieve photos of arrested persons and registered sex offenders.
- **Secure:** Manage user access via User ID’s and passwords. All access, entries, inquiries and modifications are permanently stored.
- **Regional Arrest System and Charge Codes Interface:** Minimizes keystrokes and errors. Linkages avoid duplicate data entry by importing arrest information to a mug shot photo.
- **Capture Station Includes:** Workstation, digital camera, backdrop, training and installation.
- **E-mail or export** photos to word processing applications to create wanted posters, line-ups, etc.
- **Electronic Line-up:** Using various criteria, you can print a line-up from either the sex offender or mug shot database.
- **Expansive Search Engine:** Search the sex offender and mug shot databases by name, charges, pedigree, scars, marks and tattoo identifiers.
- **Shared Mug Shots:** Photos are stored in a regional database and exported to other REJIS systems (LEWeb, CrimeMatrix).
- **Sex Offender Registry:** Creates a regional record with photo and provides various letters and reports, i.e. scheduled and delinquent renewals.
- **Support:** All hardware and software, training and installation are included in one package.
- **Data Storage:** All data resides on a server located in REJIS secure data center. The server, license(s), data backup, monitoring and security patches are included as part of this service.
