

## Automated Traffic Citations

Mobile Ticketing is an application developed by REJIS to automate the capture and printing of citations, summons and parking tickets. Using a laptop or a desktop computer, officers or desk clerks can enter and print tickets in the field or in the office. Mobile Ticketing checks the data for validity before allowing the ticket to be printed. The tickets are printed in a legible format that mimics the layout of the Uniform Traffic Ticket. Once each ticket is approved, the data can be passed to other applications, such as REJIS' IMDS (Integrated Metropolitan Docketing System) that is used by numerous municipal courts. The agency is also able to export the data to a file for further report generation by the user. Once the application is launched, the user will have access to multiple functions depending on their authorization: Ticket Search, Ticket Entry, DOR and NLETS inquiry, Hot File Check, Traffic Analysis Reporting, Field Interview Reports, and Administration.

*REJIS is a local government agency created to "serve the public interest through delivering quality, cost-effective technology services to the justice community and to government and quasi-government agencies." REJIS' primary focus is to provide record management services to law enforcement, courts, and corrections agencies at the local, state and federal levels. This includes interfaces to the Missouri State Highway Patrol's MULES system, the National Crime Information Center (NCIC), and the NLETS network. REJIS was founded in 1975 under a cooperative agreement between St. Louis County and the City of St. Louis. Our customers are primarily concentrated in the metropolitan St. Louis and southwestern Illinois areas.*

### *REJIS services include:*

- *Development of custom applications*
- *Installation and support of custom and commercially available software*
- *Custom interfaces*
- *IT Support Service*
- *Data center outsourcing*
- *Network, training and help desk support.*

*REJIS has approximately 140 employees located at three sites. Most of the staff and equipment are based at the REJIS building, in the Central West End of St. Louis.*

*For additional information on REJIS services, contact your REJIS Client Services Representative or the REJIS Help Desk (314-535-9497 or 1-888-923-7255).*

## Benefits and Features

- Produces a legible ticket in the field
- Checks the violation and other fields for validity before allowing a ticket to be saved or printed
- Allows agencies to define additional fields not found on a standard ticket
- Allows agencies to change selected field labels, maintain valid values, and specify which fields are required or optional
- Populates the entry windows with data retrieved from DOR or NLETS
- Integrates the Mobile Ticketing application with LEWeb
- Allows the ticket data to be shared with other REJIS systems, such as IMDS
- Provides a method to extract ticket information into a file format on a scheduled basis
- This service is included in the REJIS subscription service and there are no additional costs to either the police department or court
- Eliminates double entry of the citation information
- Eliminates the logging, filing and other administrative processing of hard copies

## Mobile Printer

Police departments will need to purchase a mobile printer to print the citations. It is recommended that a cradle also be purchased to secure the printer. Please contact your REJIS Client Services Representative for more information on printer options.
