THE COMPUTERWORLD
HONORS PROGRAM

Mobile Ticketing Project Recognized as Laureate by the Computerworld Honors Program

The IDG Computerworld Honors Program has recognized REJIS' Mobile Ticketing project as a Laureate. Founded by International Data Group (IDG) in 1988, the Computerworld Honors Program is governed by the not-for-profit Computerworld Information Technology Awards Foundation. In its 20th year, Computerworld Honors is the longest running global program to honor individuals and organizations that use information technology to benefit society.

Each year, the Honors Program Chairmen's Committee, a group of 100 Chairmen/CEOs of global technology companies, nominates individuals and organizations around the world whose visionary application of information technology promotes positive social and economic progress. An independent board of CIO-level judges evaluates nominations and select Laureates, Finalists and award recipients, in 10 industry-related categories, to be honored at the Laureate Medal Ceremony.

Additional information about the Honors Program can be found at the Computerworld Honors website: www.cwhonors.org.

Enforcement and adjudication of traffic laws is a major activity in municipal police departments and courts. The five major steps involved in the process are time consuming and the manual process presents numerous opportunities for the introduction of errors. REJIS' Mobile Ticketing application brings automation to the process with an emphasis on the efficient capture and reuse of information. By addressing the complete process, starting with issuing a ticket to the violator and continuing through updating the municipal court system and completing related law enforcement and court reporting forms, this is an end-to-end solution that provides benefits for the violator, police officer, court personnel and the general citizenry.

While primary use of the application is in support of the enforcement of traffic laws, the application supports referral of any case by the police to the municipal court. The Mobile Ticketing solution is part of REJIS' basic law enforcement service. When used in a patrol vehicle an associated printer is the only new cost to the agency.
